Biogas & Electric Achieves Proof-of-Concept for *NOxRx*TM

San Diego, CA – 12/13/2010 – Biogas & Electric has achieved proof-of-concept for *NOxRx*TM, a low cost NOx reduction solution for biogas engines.

Biogas & Electric is developing a novel low cost NOx reduction solution for biogas engines. Mike Matelich, Chief Scientific Officer of Biogas & Electric and inventor of *NOxRx*TM, stated “We are very pleased to have achieved proof-of-concept for our flagship product, *NOxRx*TM.”

As illustrated in Figure 1, Biogas & Electric was able to reduce NOx at a 95% rate for a period of 20 hours.

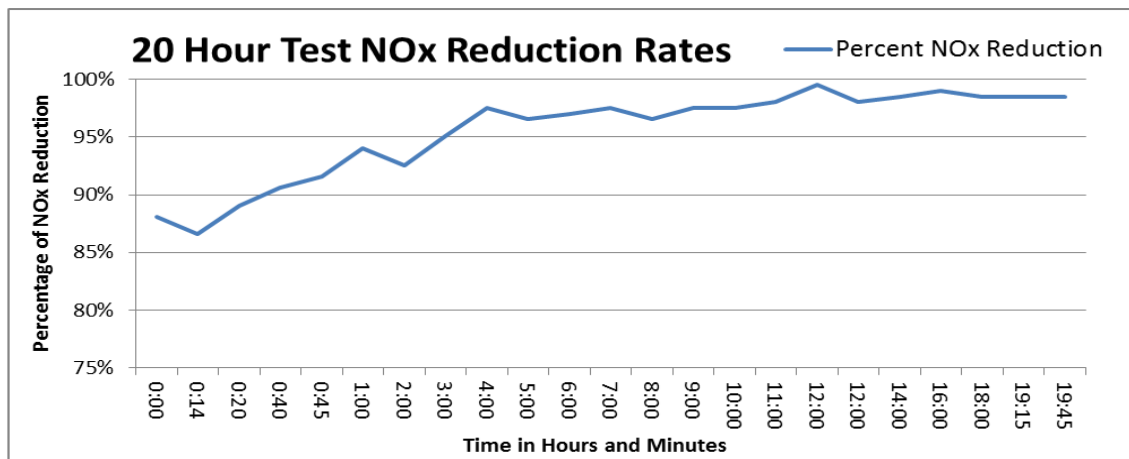

Figure 1

This is a significant achievement for the biomass industry, which has come under significant pressure to reduce emissions such as NOx, a greenhouse gas that is 300 times more damaging to the atmosphere than CO₂. Other NOx reduction technologies are expensive and have difficulty meeting stringent NOx regulations set forth by regional air quality boards such as the San Joaquin Valley Air Pollution Control District.

Biogas & Electric LLC is a technology development company with a focus on low cost NOx reduction for biogas engines. Funded by an SBIR grant and Waste Management, Inc. – Biogas & Electric makes the anaerobic digestion process cleaner.
